

**Clinical trial of
Thermobalancing therapy and
Dr Allen's Device
for CP/ CPPS (2013 -2015)**

**Effective physiotherapeutic treatment for chronic
prostatitis / chronic pelvic pain syndrome (CP/ CPPS)**

Dr Simon Allen, MD, PhD

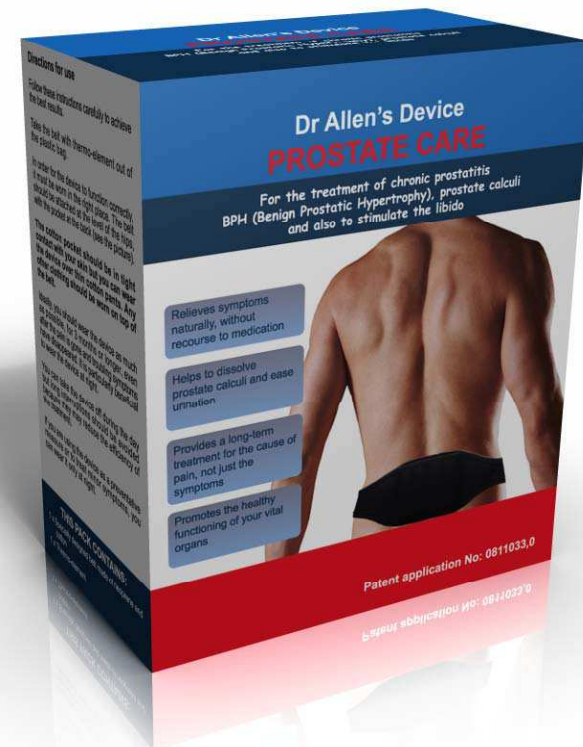

Clinical trial on men with chronic prostatitis demonstrates efficacy of Dr Allen's Device

45 men with CP/CPPS were used
Dr Allen's Device for 6-months

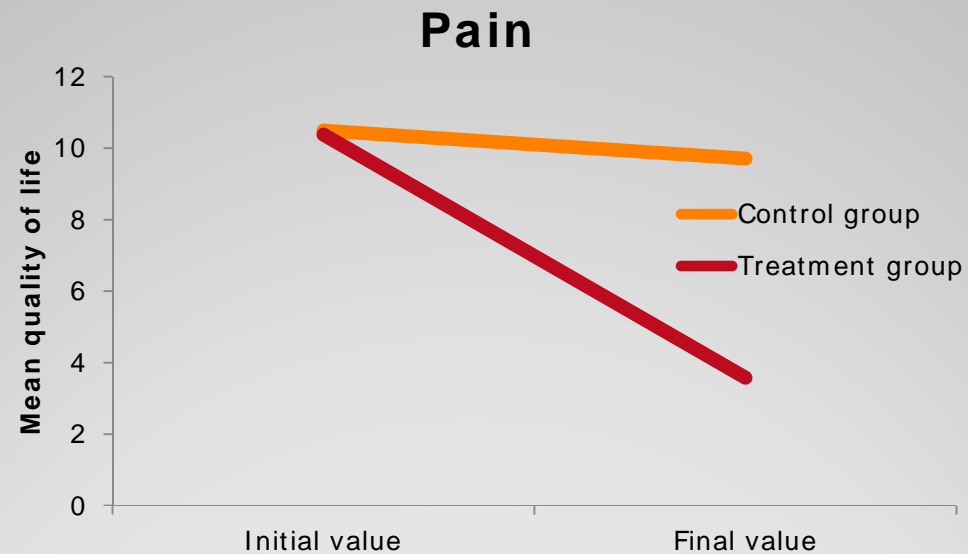

Supervised by
Professor Ivan Aghajanyan
Head Urologist of Armenia

Conducted at the Mikaelyan
Institute of Surgery, Yerevan State
Medical University, 9 Asratian St,
Yerevan, 0052, Armenia

Dynamics of changes in symptoms,
quality of live and prostate volume
see below

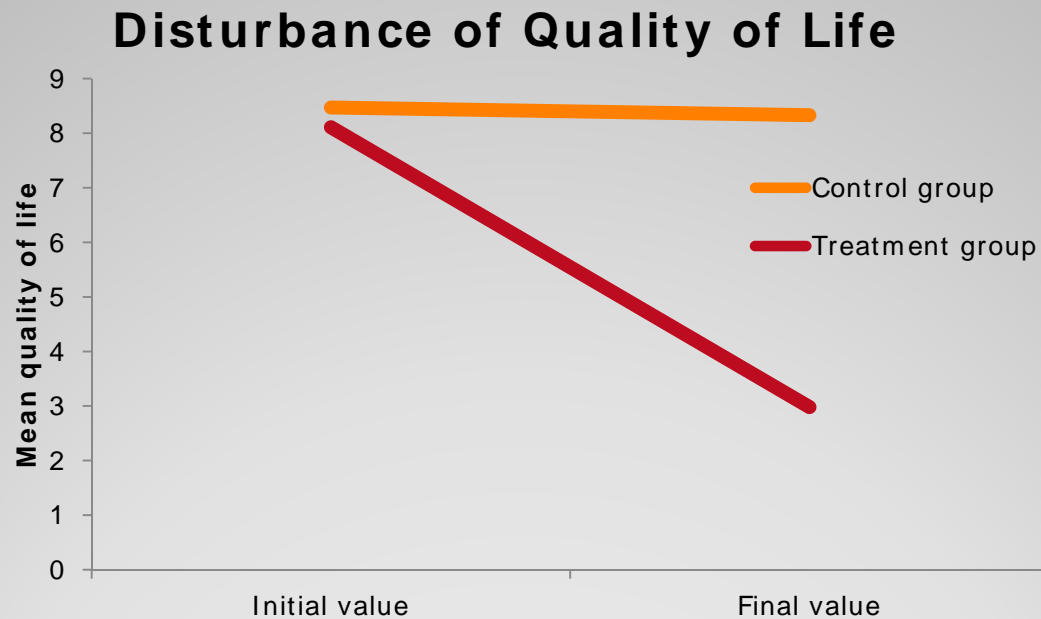

Clinical Trial: The dynamics of chronic prostatitis symptoms in 45 men

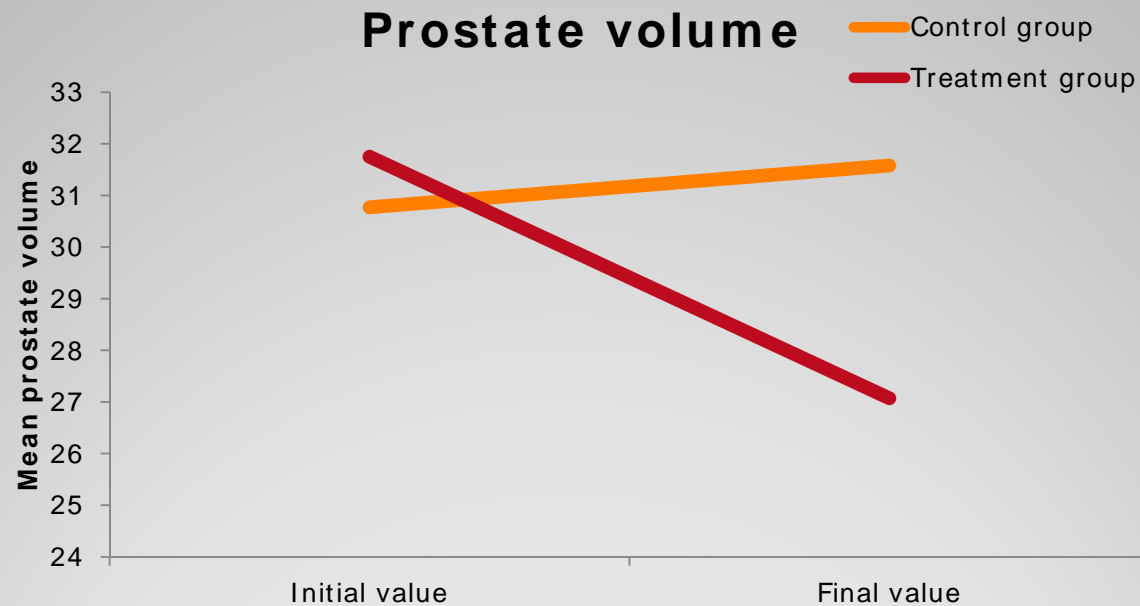

Pain decreased significantly, measured by the NIH-CPSI score. The decrease in pain with the use of Dr Allen's Device is much higher than in the control group.

Clinical Trial: The dynamics of the chronic prostatitis symptoms in 45 men

With the decrease of disturbing symptoms, the Quality of Life, as measured by the NIH-CPSI score, has improved markedly with Dr Allen's Device, compared to the control group.

Clinical Trial: The dynamics of prostate volume in 45 men with chronic prostatitis

The treatment with Dr Allen's Device significantly reduces the inflamed prostate volume.

Advantages of Dr Allen's Device and Thermobalancing Therapy

- Effective
- Non-invasive
- Cause no side effects
- Easy to use
- No hospitalisation
- Low cost solution

Conclusion:

The results of the clinical trial have shown that Thermobalancing therapy / Dr Allen's Device is able to reduce pelvic pain and improve quality of life in men with chronic prostatitis
